

Assignments in Programming for Data Science 2024

- Teaching assistants
 - Riccardo Cusinato - riccardo.cusinato@unibe.ch
 - Roman Schwob - roman.schwob@students.unibe.ch
 - Sophie Caroni - sophie.caroni@unifr.ch
- Assignments are handed in **groups of 2** people. Register yourself here: <http://tinyurl.com/PfDS24Groups> (enter with your university access). Please select the **correct tab**: Bachelor's or Master's.
- Use *SurnameName1_SurnameName2* naming scheme for your submissions. Example:
Riccardo Cusinato & Athina Tzovara = *CusinatoRiccardo_TzovaraAthina.zip*
- One submission per group
- Submit as a **.zip archive**, containing the files specified for that specific exercise
- Exercises are handed in via **ILIAS 1 week after** the assignment (i.e. before the next lecture)

Assignments in Programming for Data Science 2024

- Exercises available as
 - Notebook (.ipynb)
 - PDF
- **Jupyter Notebook** strongly encouraged, but not required
- It's **important** to use **comments** to explain what your code does and what you observe as output. This gives us the possibility to check the ownership of your code and the fact that you can discuss it.
- You're free to use whatever tool might help you with the exercises (Google search, StackOverflow, ...), but simply copy-pasting the solution is **highly discouraged** to solve the exercises.
- You are **not expected to collaborate outside of the group** on exercises and submitting other groups' code as your own will result in **0 points**.
